

Certified Courses

FLUKE NETWORKS' CERTIFIED CABLING TEST TECHNICIAN (CCTT) TRAINING COURSES

The Fluke Networks Certified Cabling Test Technician™ (CCTT) is a two-day training and certification program that covers the standards, techniques, documentation and troubleshooting of copper and fiber network infrastructure, with extensive hands-on exercises using the Fluke Networks Versiv Cabling Certification System.

It is uniquely designed for network cabling contractors and enterprise network owners who currently own or anticipate purchasing Versiv / DSX series cable certification equipment.

Why attend? The CCTT course provides expert level training on the DSX Cable Analyzer series. Investing in the Fluke Networks Certified Cabling Test Technician program will not only improve installation skills, but also your effectiveness and productivity on the job – testing, certifying and troubleshooting cabling systems.

- Versiv introduction and common settings
- Exporting configuration and results
- Copper test limits/standards
- Adapter types
- Configuring for a twist pair test
- Making a measurement and reviewing the result
- New test parameters DC Resistance Unbalance, TCL, ELTCTL.
- DSX diagnostics HDTDX and HDTDR
- Patch cord certification
- Alien Crosstalk

Day 2 – CertiFiber Pro and OptiFiber Pro Testing

- Basic fiber theory
- Encircled Flux
- Configuring the CertiFiber Pro
- Fiber inspection
- Automated analysis
- Setting a reference for a LC to LC duplex link
- Creating a custom test limit
- ISO/IEC 14763-3
- Understanding how the different connector losses differ from other standards
- Setting a reference for a simplex link. SC/APC to SC/APC
- OTDR theory
- Configuring the OptiFiber Pro
- Trace analysis
- LinkWare results management

Examination & Certificate: The course includes a multiple-choice exam, which will take place online once the course material has been delivered on each day. Results will be announced automatically after completing it online. Signed certificate with a 2-years validity will be issued to those attendees who passed each exam (and will be deemed as successfully completing the course).
