

CETM THERMAL IMAGER OPERATOR WORKSHOP

Cultivating Expertise: A Comprehensive Workshop for New Thermal Camera Owners

OUR EXPERT TEAM

BEN TAN

CE-Test & Measurement (S) Pte Ltd
Thermographer Level 2

Meet Ben Tan, a skilled Level 2 Thermographer with a passion for precision and detail. With rigorous training and a keen eye for thermal anomalies, Ben is equipped to tackle a wide range of inspection challenges. Whether it's detecting electrical faults, optimizing energy efficiency, or ensuring structural integrity, Ben's expertise delivers reliable results you can trust.

Join us for an immersive workshop designed to empower new thermal camera owners with the skills they need to maximize the potential of their equipment. Led by experienced operators, this hands-on session will guide participants through the fundamentals of thermal imaging, from understanding basic principles to practical applications.

Bring along your thermal camera for a personalized learning experience, as we delve into key techniques for efficient operation and troubleshooting. Whether you're a beginner or seeking to enhance your expertise, this workshop promises to elevate your thermal imaging capabilities to new heights

Course Fees: \$199/pax before 9% GST

*****This course is now complimentary for new Thermal Imager owners!***
